

PROJECT SOLIS
#2025

Progress Record

Wow
a
ROCKET!!

How to build a rocket:

1: do lots of technical drawings

2: don't listen to technical drawings

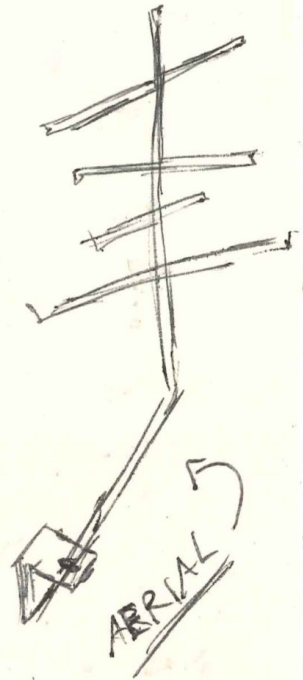

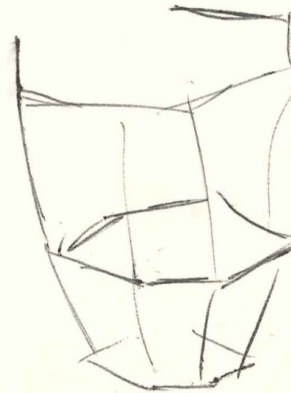

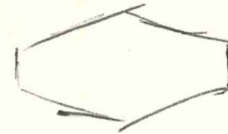

3: if in doubt... add
more maths

4: rockets go up, mostly

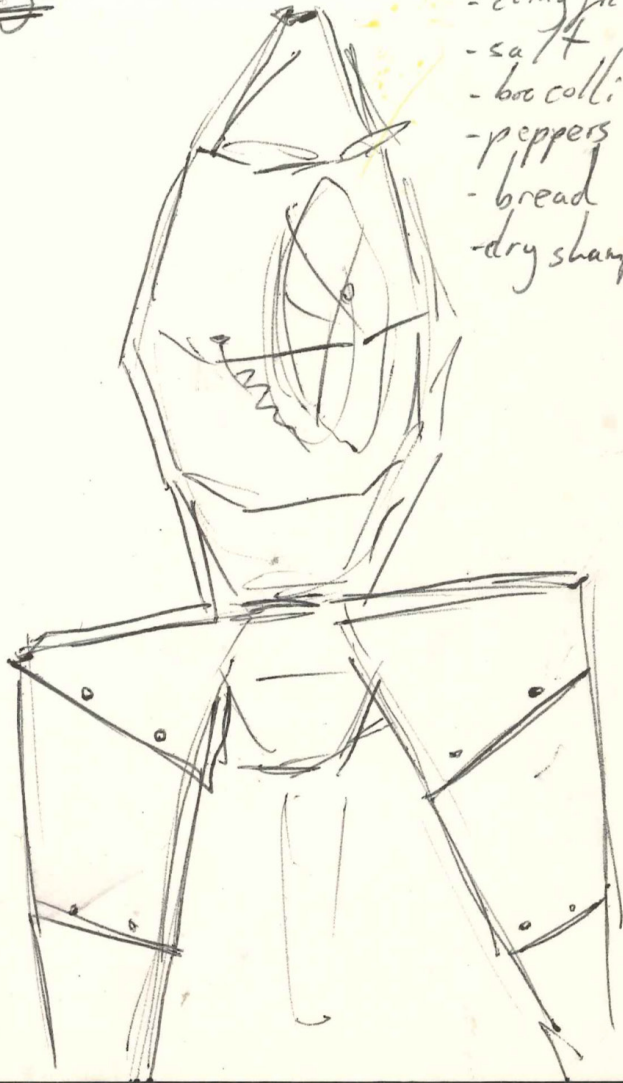

5: make sure it looks aerodynamic enough to trick people into thinking it could fly

6: never underestimate the power of duct tape

M8 x 20 order code: 12325
M8 bolts: 10063 
w paint: 10041

Legs

- cling film
- salt
- boc colli
- peppers
- bread
- dry shampoo

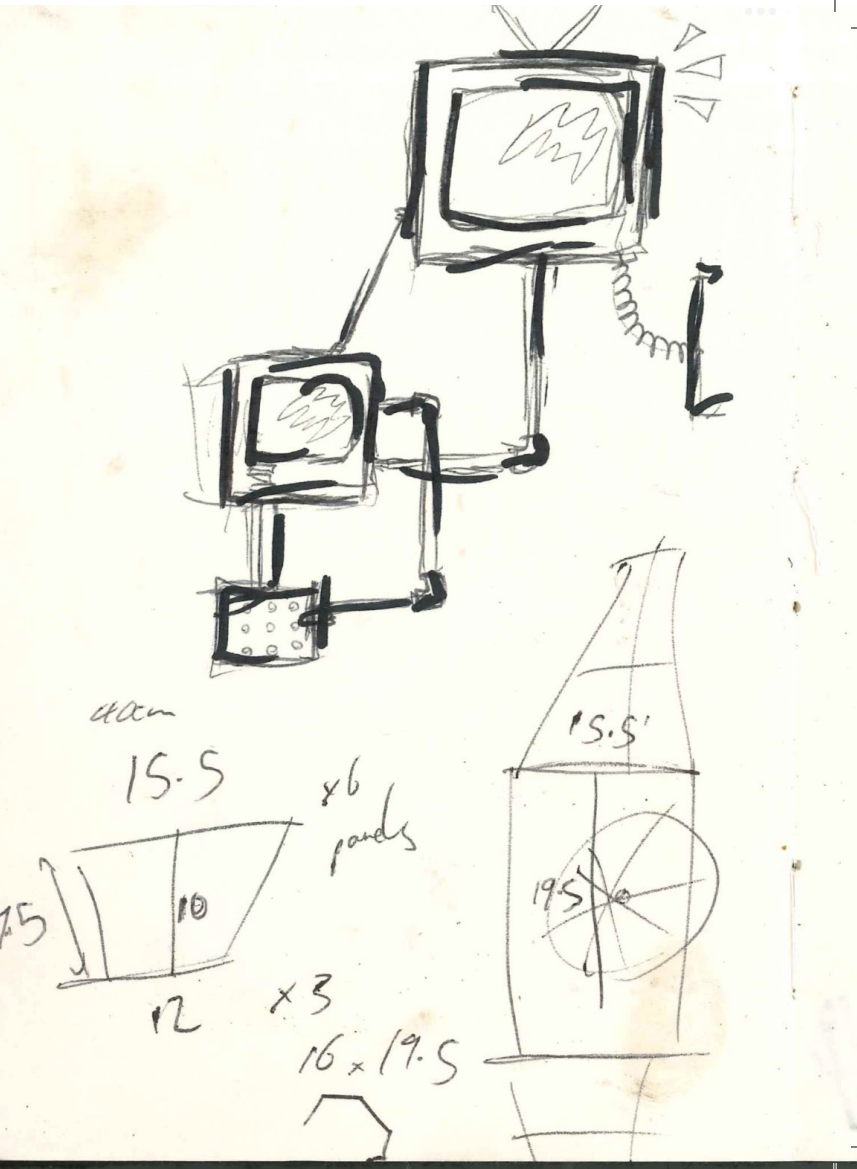

7: remind yourself you're doing this for fun

8: an extra pair of pants is always a good thing.

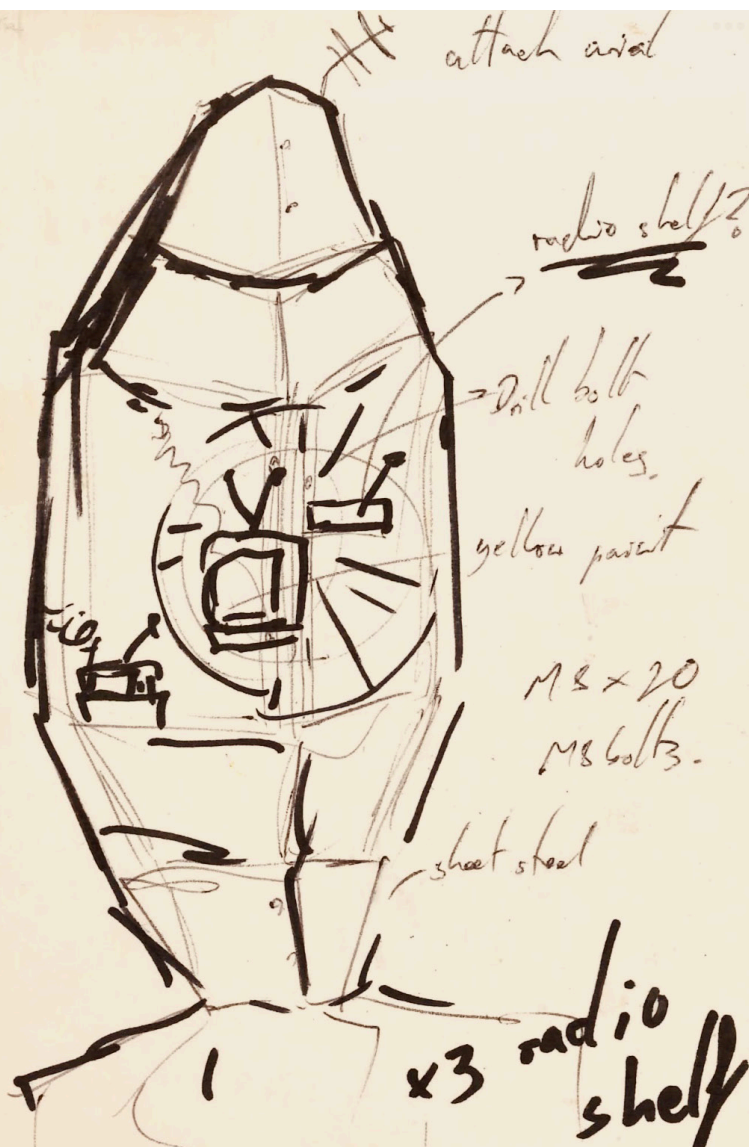

9: if it starts to
smoke it's best to
ignore it

10: be brave, frankly
it's too late to go
back now

attach aerial

radio shell?

drill bolt holes

yellow paint

Sec

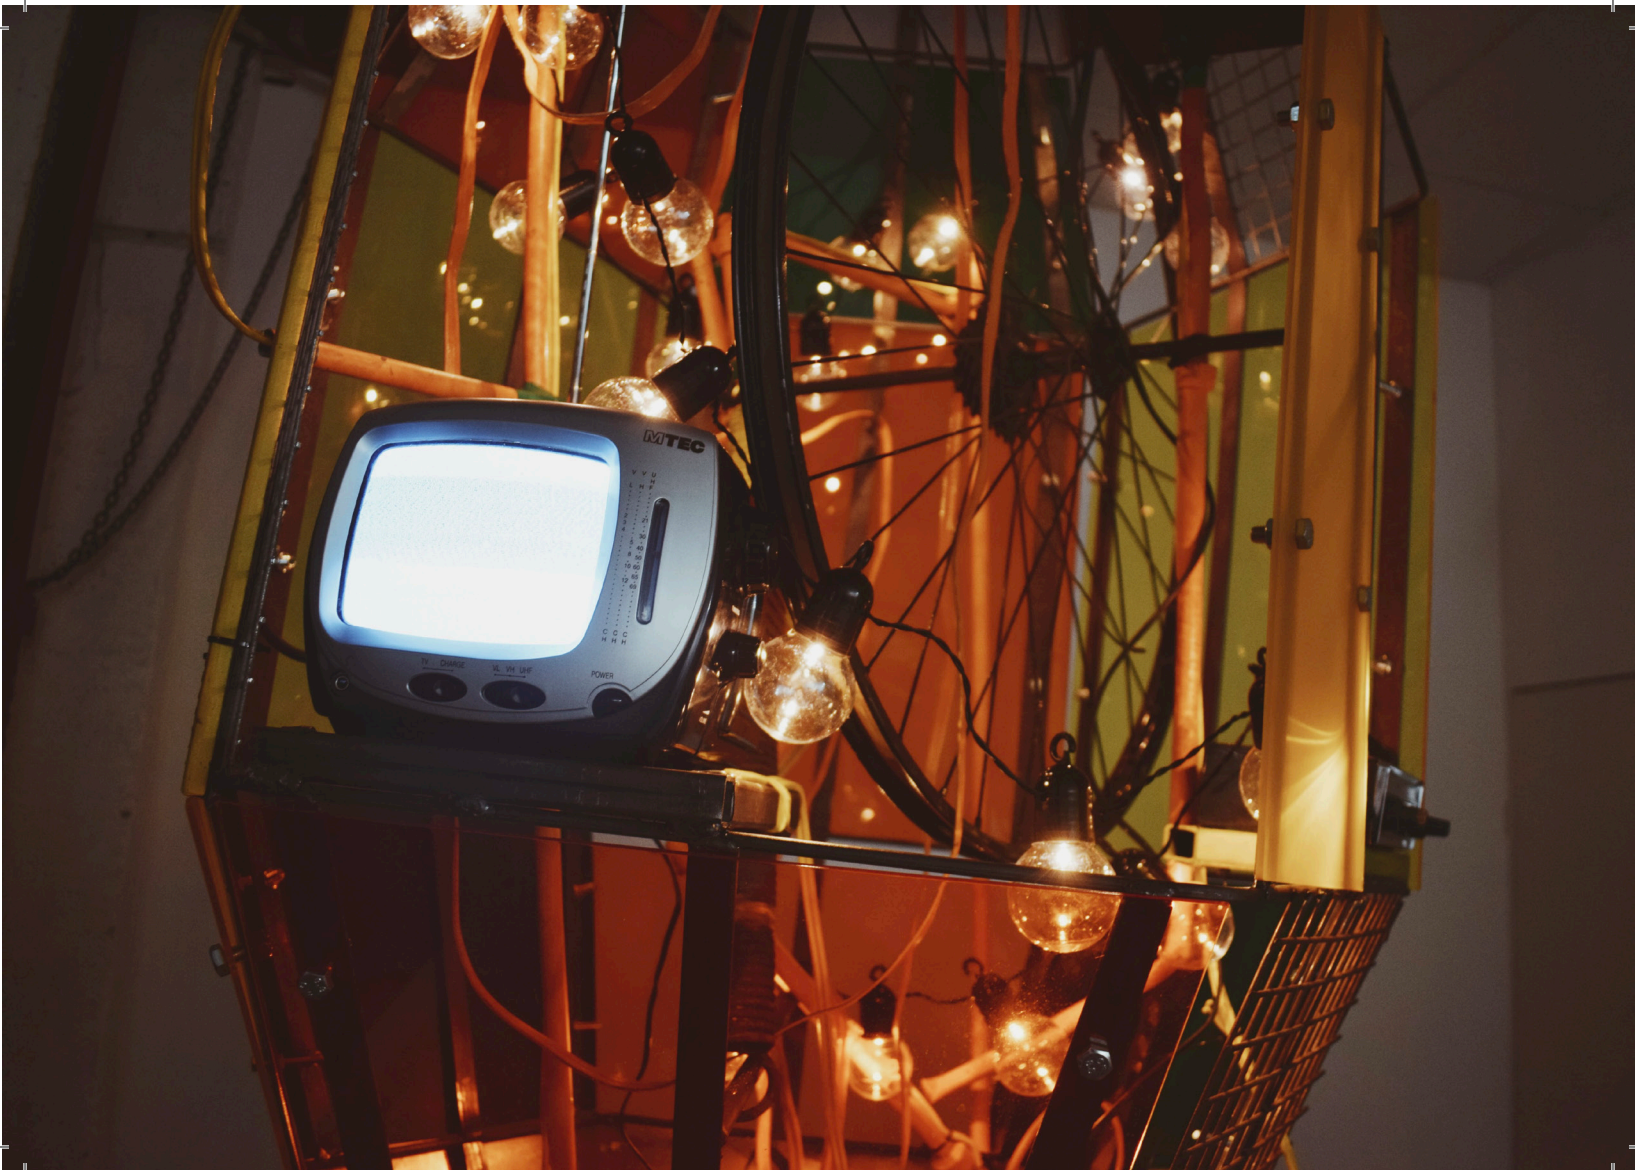

Millie -

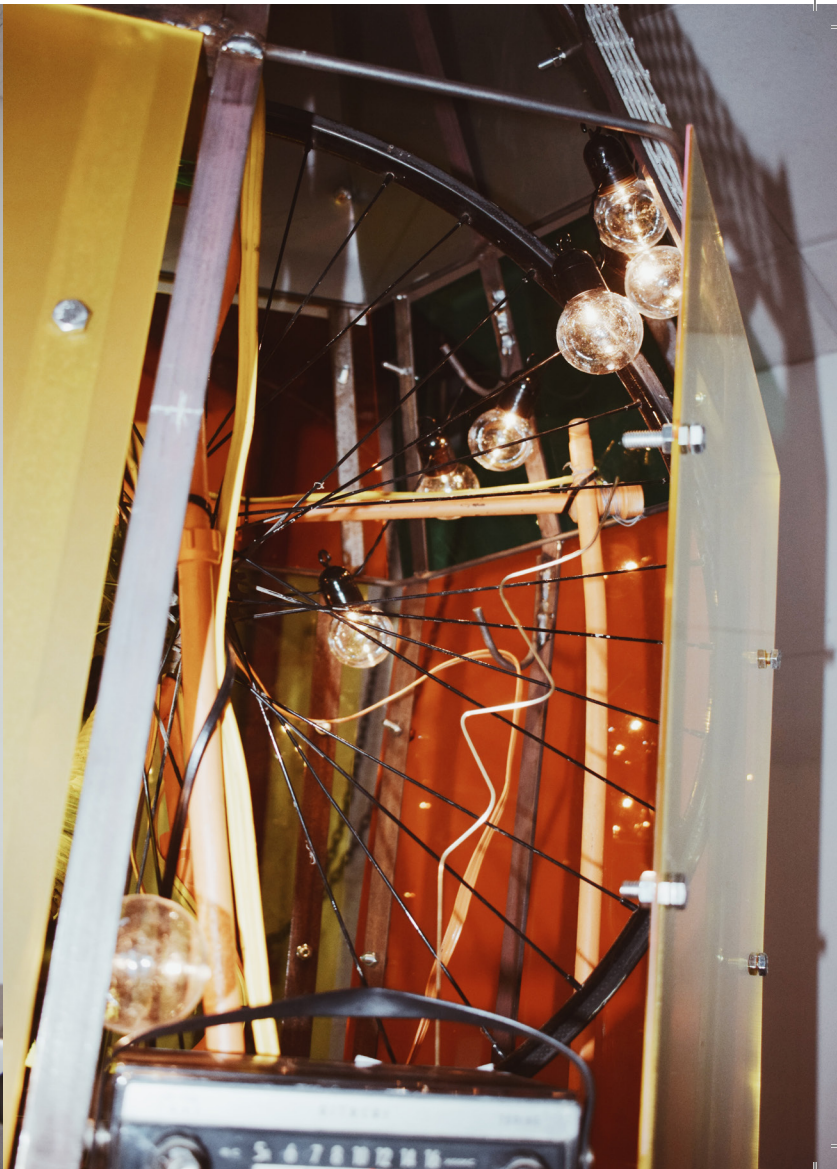

Solid is everything
I needed tonight -

- The future, the very
present - all mixed
up in joy and hope and
a moment of glorious
'take off' - what a
beautiful life metaphor -
